DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

RICK SNYDER
GOVERNOR

DAVID B. BEHEN
DIRECTOR

October 22, 2015

To All MPSCS Subscribers:

Michigan's Public Safety Communications System (MPSCS) values its customers and their investment in public safety communication resources for Michigan citizens. To serve you better, the MPSCS has restructured its subscriber fee. **Subscribers will no longer be charged a semi-annual per radio subscriber fee.** In its place, a standard one-time radio subscriber fee of \$250 per radio will be applied at the activation of a new or replaced radio on the MPSCS. To align with the billing cycle, application of the fee is retroactive to October 1, 2015.

Subscribers can expect several benefits from the new subscriber fee:

- Simplified billing tied to the same standardized services
- Reduced costs from 50 to 90 percent over the course of the radio lifecycle for most customers
- Continued growth for public safety interoperability and adoption of the MPSCS

Existing credit agreements will continue to apply to the revised radio subscriber fee.

To activate the new subscriber fee:

- Customers in good standing with up-to-date subscriber fee payments are automatically enrolled. No action is required.
- Customers with an outstanding balance for MPSCS subscriber fees must make payment to the state of Michigan before participating in the new subscriber fee structure.

Questions about the new standard radio activation subscriber fee can be directed to MPSCS staff member Dan Robinson at RobinsonD4@michigan.gov or 517-336-6621.

More information on the new standard flat rate radio subscriber fee can be at found at www.michigan.gov/MPSCS.

Sincerely,

Bradley Stoddard
